

What is **STERI-7XTR**

High Level Surface Disinfectant Cleaner?

STERI-7 XTRA High Level Surface Disinfectant Cleaner with Reactive Barrier Technology hygienically cleans practically any surface or material, eradicating bacteria, spores, fungi, yeasts and viruses up to 99.9999%.

What makes STERI-7 XTRA High Level Surface Disinfectant Cleaner with Reactive Barrier Technology your ideal disinfecting and cleaning solution is that it can keep treated areas contamination free between cleaning cycles. This is because it has the ability to go on working once dried, something no other disinfectant is proven to do.

The result is round the clock Biosecurity, with no window of opportunity for germs to re-establish themselves.

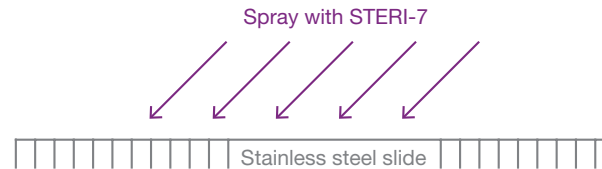

What is Reactive Barrier Technology (RBT)?

Reactive Barrier Technology is a specialised micro emulsion which provides an optional sustained release system. This means that the Reactive Barrier can be turned on or off depending on the situation. It's simple, if you rinse STERI-7 XTRA after application you remove the reactive barrier, if you leave STERI-7 XTRA to dry you enable the Reactive Barrier Technology giving you added Biosecurity and protection between cleans.

PAS 2424 ACCREDITED

PAS 2424 was designed to be an extension of EN 13697. EN 13697 provides customers with an initial antimicrobial activity while PAS 2424 provides 24 hours residual efficacy data of a disinfectant's antimicrobial activity

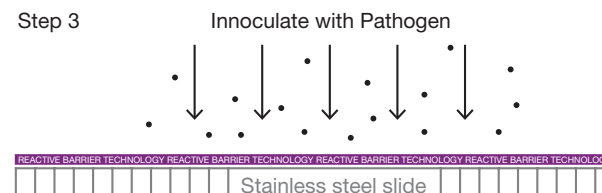

Step 1

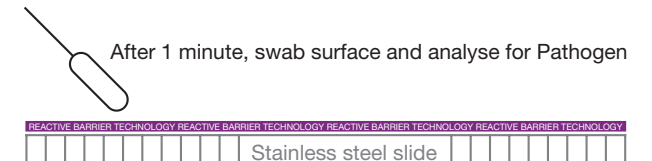

Step 2

Step 3

Step 4

Step 5

Repeat from Step 3 after 5 minutes, 30 minutes, 60 minutes and after 72 hours. **BUT REMEMBER, THIS WHOLE PROCEDURE IS AFTER JUST ONE APPLICATION OF STERI-7**

A contact slide that has been applied to a working surface. The slide clearly shows the presence of contamination

The same surface is retested with a new slide, 5 minutes after STERI-7 XTRA has been applied. No trace of contamination remains.

The same surface is retested the following day. Despite pathogens having been clinically reintroduced, again no trace remains.

What can STERI-7 XTRA High Level Surface Disinfectant Cleaner do for you?

Spray a surface with STERI-7 XTRA Ready To Use and a few seconds later mould bacteria, viruses and spores on that surface will be eradicated up to 99.9999%. But STERI-7 XTRA doesn't stop there. Leave it to dry and a reactive barrier is created on the surface.

REACTIVE BARRIER TECHNOLOGY PROTECTION BETWEEN CLEANS
HIGH LEVEL DISINFECTANT CLEANER
NON-CORROSIVE
NON-RESIDUAL ORGANOLEPTIC EFFECT ON FOOD
LOW TOXICITY
EFFECTIVE IN SOFT OR HARD WATER
NO REPORTED RESISTANCE
TRIPLE ACTIVE REDUCING NEED TO ROTATE PRODUCTS
MAINTAINS EFFICACY IN HEAVY ORGANIC SOILING, BLOOD AND PROTEINS

Properties of **STERI-7XTR** High Level Surface Disinfectant Cleaner

Broad spectrum: PROVEN wide antimicrobial spectrum

Fast acting: PROVEN 15 second kill

Not affected by environmental factors: PROVEN
active in the presence of organic matter e.g., blood,
sputum, feces.

Nontoxic: PROVEN not be harmful to the user or patient

Surface compatibility: PROVEN not to corrode
instruments and metallic surfaces and does not cause the
deterioration of cloth, rubber, plastics, and other materials

Residual effect on treated surfaces: PROVEN

Reactive Barrier Technology – Protection Between Cleans

Very **easy to use**

Odourless: choice of a pleasant odour or no odour to
facilitate its routine use

Very **Economical**

Solubility: soluble in **all** water

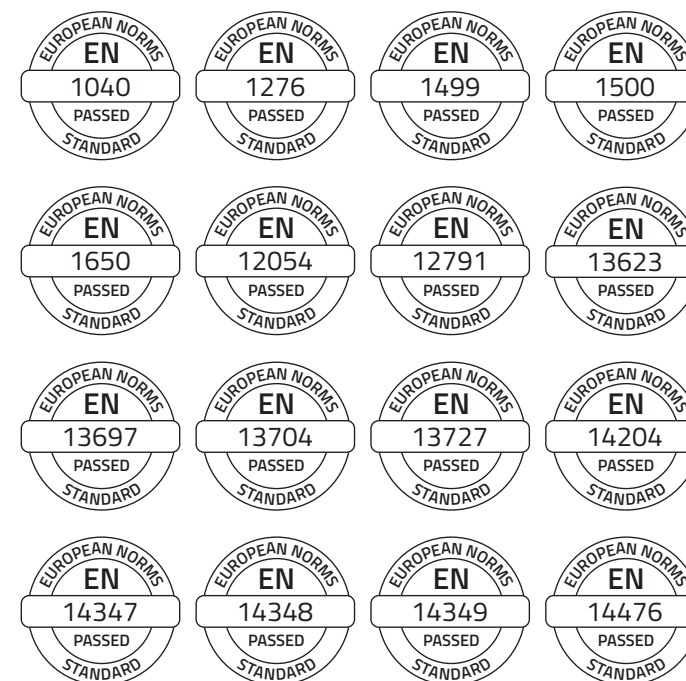

Stability: stable in concentrate and all dilutions

Cleaner: excellent cleaning properties

A selection of efficacy testing we have passed for the national authorisation of our products under the EU Biocidal Products Regulation (BPR) and other Worldwide approvals.
